March 19, 1959.

Dr. Joshua Lederberg Department of Genetics Stanford University School of Medicine Stanford, California

Dear Josh:

I enjoyed your letter and meant to answer it promptly, but then got caught in a swirl of things including a symposium at the University of Pennsylvania, which you skillfully avoided.

We're not planning to buy an infrared spectrometer as such. We're getting the Model 14M Cary which goes to 3μ ; so far we haven't gotten into the infra-red region at all.

I'll write again soon.

As ever,

Arthur Kornberg.
